

### **INSTRUCTIONS FOR USING THE DEMAGNETIZER**

1. Turn on the demagnetizer just before using. Place material to be demagnetized in a plastic bag or other container or on the surface of demagnetizer for 5 seconds, then remove.
2. Turn the demagnetizer off. Do not let it operate for over 5 minutes at a time as it will overheat.
3. Do not turn the demagnetizer off with material on the surface (this will magnetize it).
